

Description

GreenMap MIT is a project to produce green maps of Cambridge, Massachusetts and the MIT campus. A green map plots the locations of environmentally and culturally significant resources e.g; recycling centers, toxic waste sites, public art, community gardens and socially conscious businesses. The green map concept was created by Green Map System, Inc. as a means of public education.

Printing

To conserve ink and paper, please do not print this page.

The map (pages 2 and 3 of this document) is intended to be printed double-sided, so that you can easily flip the map over (on the short edge/around the long axis) to locate details about a feature. While it scales nicely for printing on standard $8\frac{1}{2}x11$ " (letter or A4) paper it is designed for $11^xx17^{"}$ (tabloid or A3) pages.

Folding Instructions

If printed on a tabloid sheet, the map will fold into a neat 41/4"x23/4" pocket-sized map like so:

- 1. Start with the map face up and the legend in the upper right hand corner.
- 2. Fold in half, bringing the right edge over to the left.
- 3. Fold in half, bringing the bottom edge up to the top.
- 4. Repeat steps 2 and 3.

Participate

If you have comments or would like to contribute in some way, we'd love to hear from you! In the future we hope to host a live web map, offer larger printed maps, and increase our scope to include a wider variety of features for all of Camberville.
